General Questions :-

1. What relevant programming languages or frameworks are you comfortable with ? State your credentials and any experience in development. Internships, passion projects, open source collaborations..we'd love to hear it all !
2. Why are you applying for this position and what qualities make you the right person for this ?
3. What improvements can you suggest in the current websites made by the institute WebOps team ?

4. How would you rate your willingness to learn new stuff? What methods do you use to learn something new ?
5. What are the things you feel InstiWebOps lacks & how would you improve that ?
6. Describe projects that you've worked on previously or are working on currently. You can include details about the design/architectural decisions you had to make and why you made them, any challenges you faced and how you overcame them. Abandoned projects are fine too (maybe you can write about the lessons you learnt from them).
7. Mention your current PORs . Also mention the PORs for which you have currently applied . How much time can you devote to working in the WebOps team ? Also mention references (if any) .

Technical Questions :-

1. Can you explain with a diagram on how the web works, what happens between user typing the url and user seeing the page content.
2. Create a web page similar to google search webpage . Try to show as much creativity as you can .
